## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 21-22 are objected to because of the following informalities:

In claim 21-22, the phrase "the method" should be changed to --a method-- if these claims are intended to be independent claims. Also, terms with lack of antecedent basis terms should be corrected to avoid indefiniteness. If claims 21-22 are intended to be dependent claims, they should include the phrase --as claimed in claim 19--after the phrase "a vehicle wheel".

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 19 recites the limitation "said means for retaining said means for biasing" in line 16. There is insufficient antecedent basis for this limitation in the claim as no previous structure has been defined as a means for retaining said means for biasing.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

Art Unit: 3617

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 21-22 are rejected under 35 U.S.C. 102(b) as being anticipated by The Prior Art drawing Fig.1.

Claims 21-22

The Prior Art Drawings Fig. 1 discloses a method of retaining a wheel cover to a vehicle wheel wherein each of said plurality of tubular extensions (52) integrally molded as a part of the wheel cover base and further the step of placing said plurality of elongated tubular extensions substantially concentric to the central axis of the wheel cover.

***Allowable Subject Matter***

6. Claims 19-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Response to Arguments***

7. Applicant's arguments filed 12/26/00 have been fully considered but they are moot in view of the allowance of claims 1-16.

New broader claim 17 as being anticipated by Bunn is properly rejected for the reasons listed above.

***Conclusion***

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frantz F. Jules whose telephone number is (703) 308-8780. The examiner can normally be reached on Monday-Thursday and every other Friday.
